Experience

Tata Consultancy Services Indore, India
Analyst – IT Operations Team Sep 2025 – Present

- Monitored and maintained RHEL servers and application processes in a 24×7 production environment, ensuring system availability, stability, and performance.
- Troubleshot Linux systems using PuTTY and WinSCP for secure SSH access and file transfers; analyzed system and application logs to identify issues and escalated incidents to relevant teams.
- Managed incidents, change requests, and service requests using ServiceNow, ensuring SLA compliance, timely resolution, and accurate documentation.
- Performed routine RHEL administration, including OS patching, service configuration, user access management, and task automation using Bash shell scripting.
- Leveraged AI-assisted development tools such as OpenCode to build a web-based operational dashboard using React and Python FastAPI to streamline operational workflows and ACL management.
- Developed Bash scripts to automate Access Control List (ACL) generation and management across multiple servers, environments, and customers, improving consistency and reducing manual effort.
- Used SQL queries to retrieve, filter, validate, and analyze data for operational reporting, data verification, troubleshooting, and dashboard functionality.

Trainee May 2025 – Sep 2025

- Developed core backend services using Python and Django.
- Gained hands-on experience in AI/ML, MERN stack development, and Business Communication.
- Collaborated with Agile teams, participating in sprint planning and iterative development cycles.
- Conducted automation testing using Python and Selenium, performance testing using JMeter, and API testing using Postman and Insomnia.
- Utilized Git, Docker, and SonarQube for version control, containerization, and code quality analysis.

EDUCATION

Bachelor of Computer Application **2021 – 2024**
Guru Nanak College, Dhanbad, Jharkhand, India

Intermediate of Science **2019 - 2021**
College Commerce, Arts and Science, Patna, Bihar, India

PROJECTS

ShikshaSetu - Autofill & AI Webextension **2025**

- Built a solution using React with a Laravel backend, integrating Chrome and Firefox extensions for autofill data management (addresses, emails, payment details) stored locally via IndexedDB.
- Implemented an offline-first approach by utilizing IndexedDB to store autofill data, ensuring functionality even without an internet connection.
- Automated form completion with an autofill feature, reducing manual data entry and enhancing user efficiency across websites.
- Enabled cross-browser and device synchronization, ensuring consistent autofill performance and data across Chrome, Firefox, and multiple devices.

- Created a user-friendly dashboard for managing, updating, and deleting autofill entries within the extension, with data stored locally in IndexedDB for offline access.
- Optimized AI chat functionality, storing interactions in IndexedDB for offline use, while integrating cloud-based (OpenAI, DeepSeek, Gemini, Meta) services for fast, responsive communication when online.

ShikshaSetu - Online Learning Management System 2024

- Utilized Next.js and TypeScript for frontend development, Laravel and PHP for backend development, and MySQL for database management.
- Leveraged expertise in React Native and Expo to deliver a seamless mobile app experience.
- Configured user roles and permissions for secure access.
- Introduced course creation, editing, management, and content delivery.
- Integrated a progress tracking system for students and instructors.
- Led a team of 5 to deliver this system.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript, Typescript, HTML, CSS, PHP, Solidity, Java, Python, SQL
Libraries & Frameworks: Laravel, Express.js, React, Node.js, Next.js, Tailwind CSS, React Native
Databases: MySQL, MongoDB
Tools & Platforms: Visual Studio Code, Postman, Git, Github, Netlify, Vercel, Render, Wordpress, Chatgpt, Docker

CERTIFICATIONS

- **Blockchain and its Applications - NPTEL**
- **C - Spoken Tutorial**
